Full eight-coordinate two-triad KvN cutoff scan
(a) Boundary occupation
max. last-two-shell probability
total-number cutoff N
(b) Mean-field error
final mean error vs classical
total-number cutoff N
(c) Cutoff convergence of means
mean trajectory difference vs N = 16
total-number cutoff N
(d) Cutoff convergence of covariance
final covariance difference vs N = 16
total-number cutoff N
